

Ensign Equipment Inc.

The Hopper Loader is designed to feed pellets, granules and free flowing powders into an overhead hopper or storage vessel. It can be used with bags or portable storage bins. It is often used to avoid climbing ladders with bags or buckets of material. Hopper Loader is equipped with 2.7" flex auger that will deliver up to 60 cu. ft. of material to an over head hopper.

The unique part about this hopper loader is its easy clean feature. The machine can be broken down for wipe out cleaning in less than two minutes.

Ensign Equipment Hopper Loaders are built to last with a heavy duty body, bearings, and an adjustable teflon shaft seal to protect the belt drive. See back page for additional specifications.

All Ensign Equipment Inc. products carry a TWO YEAR warranty covering defects in manufacture, workmanship and components. Also all STANDARD products are covered by the Ensign Advantage, a 30 day trial period guaranteeing customer satisfaction!

Easy-Clean Hopper Loader
