Portable *Vertical Ribbon* Mixer

The Portable Powder Mixer is a vertical ribbon type mixer, designed for materials that cannot be satisfactorily mixed in our standard line on vertical auger mixers. This versatile unit is mobile, adaptable to other in-plant equipment, and easy to clean. By drawing material up the sidewalls of the vessel, we have been able to achieve exceptional results blending most plastic powders. This unit also does well with dissimilar materials such as mixing a powder with a granule or regrind. We would be pleased to arrange an evaluation or test of your material!

The 44" square leg pattern will fit Portable Storage Bins and Power Hoppers as well as a variety of mixer discharge stands. Our Gravity Discharge Stand will allow you to place the mixer high enough to gravity discharge into Gaylords. The auger discharge stands will deliver your mixed material to a machine or a storage vessel and the Vacuum Discharge Stand will enable you to deliver your mixed material directly into your vacuum system.

See back page for additional specification.

Model No.	Mixer Cap.	Mixing Time
65-1000	16 cu. ft.	7 min.
65-2000	26 cu. ft.	10 min.
