

**Ensign
Equipment
Inc.**

Premier
**Ground Entry
Gaylord Tilter**

Model 10-8500

The Premier Ground Entry Gaylord Tilter is designed to assist in the vacuum unloading of Gaylord containers. The automatic tilting feature allows complete removal of material from the container with little or no assistance from your operator. The adjustable regulator permits setting initial lift at any desired weight: this unit will lift 1000# with only 80psi. air pressure! Normal operation is to begin tilting action when the box is around half empty. Ensign Equipment Tilt Tables are durable and easy to maintain. We use heavy duty 1" flange bearings to ensure smooth controlled pivoting. Our seven gauge deck along with its sound structural design make it durable enough to withstand years of abuse. These units will reduce labor cost by freeing your operator from tending his raw material flow. They also reduce material waste with the effortless, complete emptying of your container!

All Ensign Equipment Inc. products carry a TWO YEAR warranty covering defects in manufacture, workmanship and components. Also all STANDARD products are covered by the Ensign Advantage, a 30 day trial period guaranteeing customer satisfaction!
